

PIONEERING IN THE QUEST FOR WELLNESS

pi-o-neer - one who is first or among the earliest in any field of inquiry, enterprise, or progress: such as, “pioneers in medical research.”

Steve & Judy Swift
Founders, WellQuest

WellQuest is a *pioneering* expression of medical care, wellness, and aesthetics with a mission to help you and your family: **get well, stay well, and look well.**

The WellQuest vision was forged by a husband/wife team with deep roots and experience in healthcare and a passion to see a *revolution* in this nation’s healthcare system. Steve and Judy Swift of Tulsa, Oklahoma, created the solution that they had always dreamed of for their own family. Steve brought insights and expertise of thirty years experience in managing hospitals, large physician groups and healthcare corporations. Judy, the daughter of a physician and the sister of four medical doctors, brought thirty years of experience of being a wife and mother who dealt with all the frustrations and obstacles of medical offices and emergency rooms that treated sicknesses but offered no real guidance for preventative and healthy living. The result is WellQuest’s physician-directed, customer-oriented service which integrates the best of conventional and alternative medicine to provide “**medical care of the future**”...treatment, prevention and aesthetics. At WellQuest, we want our clients to:

GET WELL “*raising the standard for healthcare, but not the price*”

WellQuest is founded upon full-service physician medical care when you need it – physicians who care for men, women, and children 7 days a week with laboratory, x-rays, injections and more. For your convenience, you can be seen with or without an appointment. The WellQuest staff believes that “customer service” is a healthy medical term!

STAY WELL “*the centerpiece of the WellQuest mission*”

WellQuest is committed to preventative and wellness alternatives, **because good medicine is far more than medications and treating symptoms.** Our “integrative healing” treatments include nutritional counseling, lifestyle and behavior education, targeted and optimum health private sessions, and high grade bio-absorbable supplements to strengthen the body and accomplish lasting changes. We provide sophisticated laboratory testing for vitamin and mineral deficiency, as well as hormone deficiency. WellQuest also offers a “proper weight program” with technology for advanced body composition

analysis. Our infrared sauna and therapeutic massages address health issues of stress, high blood pressure, and joint/muscle injury.

LOOK WELL “*your healthy skin and body reflect inner health and vibrancy*”

At WellQuest “health is from the inside... out”. WellQuest is an elegant spa retreat for those who understand the importance of taking time for the purpose of healing, renewing, and restoring. In addition to stress relief through infrared sauna and massages, WellQuest targets anti-aging with advanced medical facial treatments and procedures. The foundation for your skincare plan is **Skinprint (WellQuest is the exclusive provider in NW Arkansas).** Skinprint’s cutting-edge technology for skin analysis combines digital imaging with five levels of biometric testing to assess the health and condition at multiple levels of your skin. A New York laboratory interprets the results to prepare custom-formulated skincare products delivered to each client.
